College Baseball Predictions

TOP 5 PICKS OF THE WEEKEND

#1 Lamar (+380)

Lamar @ Texas A&M

```
  Model: 46.6%  |  DK Implied: 20.0%  |  Edge: +26.6%  |  EV/$100: $+123.7
```
 Big edge on paper but driven largely by cold-start models defaulting to ~50/50. DK has Texas A&M as a heavy favorite for good reason. Monitor this matchup as data accumulates -- if the edge persists in week 3, it's real.

Confide

#2 Western Illinois (+600)

Western Illinois @ Arkansas

```
  Model: 40.2%  |  DK Implied: 13.7%  |  Edge: +26.5%  |  EV/$100: $+181.4
```
 Big edge on paper but driven largely by cold-start models defaulting to ~50/50. DK has Arkansas as a heavy favorite for good reason. Monitor this matchup as data accumulates -- if the edge persists in week 3, it's real.

Confide

#3 Youngstown State (+440)

Youngstown State @ Ole Miss

```
  Model: 43.3%  |  DK Implied: 17.8%  |  Edge: +25.5%  |  EV/$100: $+133.8
```
 Big edge on paper but driven largely by cold-start models defaulting to ~50/50. DK has Ole Miss as a heavy favorite for good reason. Monitor this matchup as data accumulates -- if the edge persists in week 3, it's real.

Confide

#4 Wofford (+550)

Wofford @ Lsu

```
  Model: 38.8%  |  DK Implied: 14.8%  |  Edge: +24.0%  |  EV/$100: $+152.2
```
 Big edge on paper but driven largely by cold-start models defaulting to ~50/50. DK has Lsu as a heavy favorite for good reason. Monitor this matchup as data accumulates -- if the edge persists in week 3, it's real.

Confide

#5 Wright State (+275)

Wright State @ Kentucky

```
  Model: 47.4%  |  DK Implied: 25.5%  |  Edge: +21.9%  |  EV/$100: $+77.7
```
 Big edge on paper but driven largely by cold-start models defaulting to ~50/50. DK has Kentucky as a heavy favorite for good reason. Monitor this matchup as data accumulates -- if the edge persists in week 3, it's real.

Confide

EARLY SEASON DISCLAIMER: Most models have limited game data. The prior and Elo models carry the ensemble right now. Stats-based models (Pythagorean, Log5, Advanced, Pitching) are near 50/50 on everything, which inflates underdog edges. Treat these as directional, not actionable, until ~3 weeks of data accumulate. The model will sharpen significantly as results come in.
